PHASE 1: ASSESSMENT AND DEBRIEF

When an executive wants to discover the strengths, attitudes and growth potential of the management team, or uncover the source of interdepartmental conflict, a three-phase <u>Leadership Snapshot</u> is a highly effective tool. We are diagnostic experts. Our process produces an insightful needs analysis with practical recommendations for making significant, effective changes.

In Phase 1 each participant will:

- 1. Take the Winslow Profile and read the 45-page Winslow Report
- 2. Complete a Winslow Debriefing worksheet. Each participant will identify the three traits that are most contributing to their personal and professional success and three traits that may be restraining them.
- 3. Each person will receive a one-hour profile debriefing with a highly trained Performance Coach.

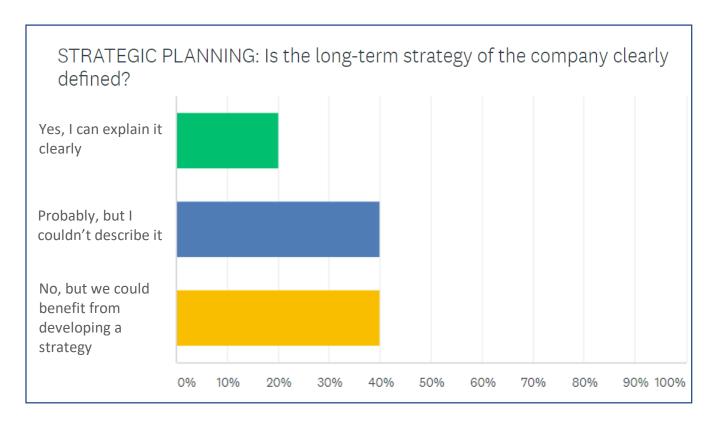

PHASE 2: THE CULTURE SURVEY

In Phase 2 we request that your leaders reply to a short, anonymous survey that seeks to discover their private insights about your company culture. The survey addresses 10 categories: Unity, Meetings, Strategic Planning, Ethics, Communication, Upward Mobility, Decision Making, Engagement, Authority and Morale.

Example: Strategic Planning

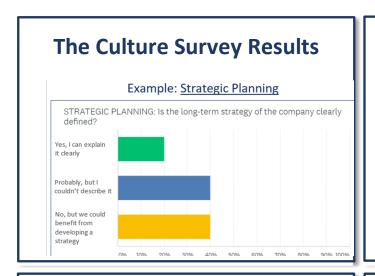

Senior leaders in our client organizations have developed improved communications, morale-boosting projects, and newly clarified career tracks as a result of Phase 2 alone.

PHASE 3: THE EXECUTIVE BRIEFING

In Phase 3 of The Leadership Snapshot we conduct a 2-3 hour Executive Briefing to discuss results and make recommendations from the information collected during our diagnostic process. The Briefing consists of four components as reflected below.

Individual Debriefing Results

Review each participant's profile and offer coaching recommendations

Provide the executives with access to a 15-page Manager's Reports on each participant

Conclusions & Recommendations

Open-floor Q&A to discuss recommendations for individual, team and systemic improvements

INVESTMENT: \$995 / person (5 person min.)
