

## Video Testimonial Login Instructions

Hello!

Thank you for offering to create a video testimonial which we can upload to our website. You can login to our site and record your testimonial using your phone's camera. Or, you can pre-record and upload a video to us from your camera roll/photo gallery. We recommend using a cell phone because its camera is usually far superior to those built into laptops.

On this landing page you will find a document which provides technical guidance and also provides a few questions to prompt your thinking. You are, of course, free to share whatever is on your heart. Try not to feel any pressure that you need to get everything perfect. Any mistakes or pauses will certainly be edited out.

To directly record your testimonial video to our site, or to upload it from your camera roll, please visit this link and enter the information shown below.

<https://winslowsolutions.com/client-upload/>

**-User:** <client>

**-Password:** <upload>

Our server will probably ask you to verify your identity. Once you are past the verification screen, you MAY need to login again using the information above.

Thank you.
